AIR FRAME

Lightweight & Inflatable Awnings
caravan • campervan • motorhome • accessories

Born of Aspiration...

Here at Outdoor Revolution we strive to create the ultimate, most reliable and innovative products for our customers to ensure they experience the very best of the great outdoors. Established in 2003; Outdoor Revolution pioneered the lightweight awning and have since aspired to be the leading manufacturers in the Caravan and Motorhome Awning and Tent industry. We have used these years of learning to design, manufacture and provide the most desired products whilst offering unequalled value for money...

...Be Part of the Revolution! 

The Revolution of Outdoor Living...

Over the years we at Outdoor Revolution have observed a dramatic change to outdoor living; the whole outdoor experience has never been as comfortable or luxurious as it is today. This has in turn challenged our designers to create the most reliable, easy to erect and luxurious products to match our customers' expectations.

Our design brief is quite simple; to create a premium range of Caravan and Motorhome Awnings using the best quality fabrics and components available.

In the ensuing twelve years of developing lightweight awnings we have designed, invented and perfected some of the most technological advances used in this market today. From patented Intelligent Frames with pressure relief valves, to protecting materials with SunPro UV coating and removable breathable groundsheets.

Here at Outdoor Revolution we recognise that our customers' positive experience of using our products and brand are our main priority. Priding ourselves in selecting the most knowledgeable stockists and delivering outstanding customer service.

As the Pioneers and Innovators within this field, **Outdoor Revolution** are so confident in the reliability of any product with an Intelligent Frame that we offer a ***LIFETIME GUARANTEE** on the Air Tube, with an IF Valve...

...NO other manufacturer has the confidence to offer this warranty!

Why buy an Outdoor Revolution Product?

Vortex Ventilation: Condensation is an inevitable occurrence but is minimised with inclusion of Vortex Vents. These conically engineered vents are strategically placed around the product and designed to provide optimum airflow.

Tintz Tinted Windows: The Tintz Tinted Windows give a contemporary feel and also reduce the glare from the sun. They create a calm and relaxed environment inside the product for you to enjoy. As we design all products with very large windows the Tintz also provide a little more privacy.

Endurance Storm Straps: Strong and Durable storms straps with reflective strips. They are designed to give additional stability to the product and are moveable to ensure maximum protection against the elements.

Zip-In Curtains: All Outdoor Revolution products have integrated curtains; Quick and easy to use and provide complete privacy when zipped in or can be quickly opened and stowed and allow complete enjoyment of the surrounding area.

Zips: We use two weights of zips for general doors and windows we use Light weight coil zips, these are heat resistant and fully rustproof, ideal for outdoor use. For areas where added strength is needed we use a heavy duty 'toothed' zip; these are ideal for our additional annexes and have the same heat resistant and rust proof properties of the coil zips.

Seams: All critical seams are taped to ensure maximum water resistance; we also have storm guards and rain gutters to protect seamed areas near doors.

Exclusive Acrylix Fabrics

At **Outdoor Revolution** we only use the very best materials to create our products. Our fabric is critically important in the design of any awning or tent and we select only the most appropriate textiles to ensure optimum strength to weight ratio for overall unrivalled performance.

Denier

We select the most appropriate weight for each product to ensure optimum performance. From our high tech lightweight 68 Denier to our heavier 420 Denier, providing unequalled strength and a superior luxurious touch.

Double Rip Stop

Reinforcing threads are woven through the fabric in a 'double' micro grid pattern to create an exceptionally strong material whilst maintaining its lightweight properties.

Sun Pro UV

Our fabrics are treated with an exclusive UV protective coating; **Sun Pro UV** defends the material against the sun's harmful rays and can make the fabric last up to three times longer than any unprotected awning or tent.

Oxygen Air Frame

Dynamic Speed Valve

Taken from the marine industry this valve has been tested to its limits. This valve is the fastest and most reliable valve on the market. It is simple to use where inflation involves attaching a pump to inflate and fast deflation is simply the push of a button.

Intelligent Frame Relief Valve

This relief valve measures the pressure inside the Oxygen Air Frame and releases any surplus air. As ambient temperatures vary and air expands inside the tube the valve releases additional air to prevent the tube from over inflation providing you with peace of mind.

Lifetime Guarantee

The Oxygen Air Frame comes with a 'Lifetime Guarantee', this means that in the unlikely event should any manufacturing faults be experienced with the Oxygen Air Frame during the time you own the product you can get in touch with us and we will resolve the issue.

Superior Premium Air Tube

Upgraded air tubes and double skinned casings for 2016 on all air models to give you ultimate confidence.

NEW
2016 MODEL

“A compact, lightweight and incredibly stable, quick and easy to erect air frame awning”

The **Speed X1** is a refreshed version of the previous Speed models but with revolutionary technologies. The single welded tube is exceptionally easy to inflate and is shaped to provide ultimate space inside the awning.

MAGNETIC AWNING CONNECTOR

MAG-CONNECT

Designed by & manufactured exclusively for...

**OUTDOOR
 REVOLUTION**
 WWW.OUTDOOR-REVOLUTION.COM

The **Mag-Connect Awning Connector** is a simple yet brilliant method to attach your driveaway awning to your campervan without the need of an awning rail. Made from easily wipeable and tough PVC, the connector contains 4 flat strip magnets & 5 powerful neodymium magnets to achieve a secure fixing to your campervan & simply attaches to your driveaway awning cowl with figure of '8' strips (included). Coupled with loops to attach storm straps in adverse weather conditions, the mag-connect is set to become the must have product for camper van enthusiasts.

Total length - 270cm

JET-STREAM

COMPACT HIGH PRESSURE AIR PUMP

Designed by & manufactured exclusively for...

**OUTDOOR
REVOLUTION**
WWW.OUTDOOR-REVOLUTION.COM

A 12V ELECTRIC PUMP DESIGNED SPECIFICALLY FOR THE SPEEDY & EFFORTLESS INFLATION OF MODERN AIR AWNINGS & TENTS...

The new Outdoor Revolution Jet-Stream compact high pressure 12v electric air pump has been designed specifically by us with a host of features not normally found in electric high pressure pumps for air awnings and tents.

Designed to make life a little easier when erecting and inflating your air product, the powerful Jet-Stream air pump cleverly allows you to pre set the PSI cut off point, eliminating the danger of over-inflation*. Once the Jet-Stream pump reaches the set PSI level, it will automatically cut out.

Integrated into the main body of the pump is a clever and convenient cable storage reel, allowing for the power cable to be retracted back inside the pump after use with an easy to use reel handle. The 12v power plug is then securely held in place within the rear recess clip.

The stylish Jet-Stream pump comes complete with a flexible air hose, a selection of air nozzle adaptors and is designed to fit most leading brands of air awning & tent inflation valve ports. The package comes complete with a handy storage/carry bag to safely store and protect the Jet-Stream pump when not in use.

A simply 'must have' accessory for all air awning and air tent campers out there.

Why not check out the Outdoor Revolution website to see the powerful Jet-Stream air pump in action?

www.outdoor-revolution.com

- ADJUSTABLE PRE-SET PSI AUTO CUT OFF FEATURE
- POWERFUL INTERNAL HIGH PRESSURE PUMP
- DIGITAL LCD SCREEN READOUT INDICATOR
- CAN BE SET TO INFLATE TO A MAXIMUM OF 8 PSI
- INTERNAL WIND IN CABLE TIDY REEL
- SECURE 12V PLUG HOUSING CLIP
- INCLUDES A HANDY CARRY/STORAGE BAG
- COMPACT SPACE SAVING DESIGN
- INCLUDES AIR HOSE & VALVE ADAPTORS
- ERGONOMIC CARRY HANDLE
- 12V ELECTRICAL POWER SOCKET REQUIRED

* Please note it is important to first check the recommended maximum PSI level by the manufacturer of your air product before attempting to use the jet-stream air pump.
