PORCHLITE 200

INSTRUCTIONS & CARE MANUAL

IMPORTANT: PLEASE CHECK YOUR EQUIPMENT

- 1 X FLYSHEET (OR OUTER)
- 1 X FIBREGLASS POLE FRAME
- 1 X BAG OF GROUND PEGS
- 1 X REPAIR KIT
- 1 X CARRY BAG
- 1 X DRAUGHT SKIRT
- GUYLINES

We recommend that you insure your caravan awning against storm damage, or accidental damage, as the warranty does not cover such eventualities. The manufacturer **IS NOT** liable for any damage caused to the caravan awning, or its contents, due to misuse, incorrect pitching or severe weather conditions; full warranty details are found on the rear of this booklet.

- Damage caused by incorrect maintenance of the product.
- Flaws in the fabric caused by excessive use.
- Imperfections and pulls in mesh doors due to wear and tear.
- Water ingress through fabric as a result of accelerated UV degradation due to long term pitch .
- Water ingress through seams caused by excessive abrasion of seams or taped seam.
- Broken zips caused by over tensioning, forcing or snagging.
- Over tensioned/stretched seams coming apart.
- Buckles subjected to undue force or abrasion.
- Lost/popped out eyelets.
- Broken holdalls.
- Pole breakages or tube punctures (where applicable).
- Collateral damage from a pole breakage.
- Condensation, (a natural occurrence, exacerbated by insufficient ventilation opening).
- Consequential damage/loss to property/belongings (either inside or outside of the product) or shortening of holidays.

Outdoor Revolution work very closely with our retail partners to manage all warranty repairs/issues:

Please contact your retailer immediately (even if purchased online) if you feel your Outdoor Revolution product has a genuine warranty issue. The retailer, in turn will raise the issue with ourselves and we will action; with the retailer, according to the nature of the claim.

Returning Products

Please ensure the product is clean and dry and as close to its original condition as possible before sending back for checking. Wet or dirty products will not be accepted back for checking/warranty claims.

It is important to note that the Sales Contract between yourself and the retailer you purchased the Outdoor Revolution product from, remains valid throughout any warranty claim and your statutory rights are not affected.

OUTDOOR REVOLUTION GUARANTEE

Outdoor Revolution products are designed and produced to the very highest of manufacturing standards, using the best quality fabrics or components available for each specific model. Rigorous quality control of finished products is in place.

All manufactured products are:

- Quality controlled to be free from minor defects.
- Fit for the purpose that they are intended for.
- Manufactured to a satisfactory quality.

It is important that correct care is taken when opening, erecting, using, and just as importantly, packing away the product. Following these rules will keep your product in reliable working condition for many years. Failure to adhere to these simple guidelines may cause unnecessary damage to the product (see formal instructions for handling/erection tips). A repair kit is included with each of our products to help resolve any minor issues.

THE WARRANTY

The Outdoor Revolution Warranty lasts for twelve months from the original date of purchase; please keep all receipts or copies of any relevant transaction to substantiate the purchase date. This warranty only covers the workmanship, fabric and components. Any faults found within six months of purchase will be investigated by Outdoor Revolution. Faults found outside of the initial six months of purchase will need to be proven by you, the purchaser, in line with current consumer legislation, after the short term right to reject has concluded. **Please note that this warranty requires registration on our website.**

Retailer will not refund a purchase if no fault is found.

The manufacturer's warranty does not cover the following:-

- General wear and tear over extended periods of use or, seasonal pitching of the product.
- Accelerated UV damage caused by excessive, long term sun exposure.
- Accidental damage caused by but not exclusive to, human, animal or weather.

IMPORTANT INFORMATION

- ◆ Please do not leave for your holiday without fully erecting and checking that you have all the listed contents for your caravan awning. If you are missing anything, then please contact your retailer immediately before use.
- ◆ Please note that man-made fabrics are prone to condensation, when the warm air and moisture within the caravan awning, comes into contact with the colder air on the outer material; this is a perfectly natural occurrence and should not be confused with leaking. Please ensure that all ventilation points remain open, wherever possible, in order to help combat condensation.
- ◆ We suggest that you pitch your caravan awning for some period before use, enabling it to undergo the 'weathering' process. Weathering sometimes requires a few uses of the caravan awning, before it becomes effective. Seam sealant can be used to resolve any persistent weeps; this is a natural process. 'Weathering' is the process of allowing your caravan awning to become soaked, then dried, approximately two to three times, in order to reinforce the waterproofing of the seams/stitching on the flysheet.
- ◆ Please ensure that you site the caravan awning on clear/level ground before erecting, with no sharp objects beneath it and zips fully closed. We suggest placing a groundsheet underneath the caravan awning to keep it dry/clean.
- ◆ We suggest conducting a trial run of your caravan awning to familiarise yourself with the assembly and usability of it. Should you have any issues pertaining to the erection of your caravan awning; please contact a dealer for assistance before your holiday.
- ◆ This caravan awning is designed for 'touring' use and not seasonal long-term pitch.
- ◆ Always dry/air the caravan awning after use, before packing away, to prevent mildew or mould from developing.
- ◆ Any dirt or stains can be removed by brushing, or gently washing, using warm water. DO NOT use detergents, as this will destroy the water resistance of the materials.
- ◆ DO NOT cook or smoke inside this caravan awning, as despite the outer fabric being flame-retardant, it can still melt.
- ◆ In the event of damage; please contact your retailer. If, for whatever reason, you are unable to contact them, then please email cs@blue-diamond-products.co.uk and our dedicated customer service team will be pleased to assist you.
- ◆ Please avoid using this caravan awning in temperatures below freezing, as this can result in damage to the fibreglass pole frame.
- ◆ Always store your caravan awning bag flat, rather than on its side, as well as in a cool/dry area, in order to avoid detrimental impact on the fibreglass pole frame.

OPTIONAL ACCESSORIES

- **Treadlite 200** — A cut to size porous caravan awning carpet, which provides fully breathable properties and is suitable for any pitch.
- **Canopy Poles** - A useful pair of steel poles, which can be used to support the front door in an upright position, creating a small porch area, should you wish to.
- **Rear Pad Poles**— A pair of adjustable upright steel poles, which allow a more snug fit of the porch awning to your vehicle.
- **Lumi-Link Tube Light Kit**— A triple remote controlled dimmable LED roof strip light kit, designed to create a cosy internal evening ambience within your porch awning.
- **Roof Tension Pole Kit** — Extra steel poles that can be inserted into the designated internal roof pockets for further stability throughout adverse weather conditions.

⇒ **Selection of folding chairs and collapsible furniture.**

12 MONTH WARRANTY

On Workmanship & Canvas Against Any Manufacturing Faults.

PACKING AWAY YOUR CARAVAN AWNING

- ◆ Zip up any windows/doors before packing away your porch awning.
- ◆ Remove the fibreglass pole frame from the sleeve before packing away.
- ◆ Unpeg all guylines, storm straps and most of the pegs around the caravan awning, leaving each of the four corners pegged out.
- ◆ Unpeg each of the four corners.

Allow the porch awning to collapse on itself, compressing the canvas as much as possible.

Fold the caravan awning on itself vertically to create a rectangular shape.

Fold the caravan awning on itself to create a streamlined shape. Measure the width of the folded caravan awning against the carry bag to make sure that it will fit inside, before rolling the porch awning into it, compressing as you roll.

Rotate the rolled caravan awning onto the bag, pull the sides up around it, then zip up the carry bag.

6. Insert the pin (from Ring & Pin) into the bottom of the pole, at each end, allowing the awning to stand upright.

7. Clip each of the black 'c' clips onto the exposed sections of the poles to securely hold them in place.

8. Secure any remaining pegging points, guylines or storm straps, starting from the corner nearest the vehicle, before working your way around the caravan awning; please be careful to not over-tension the material whilst doing this.

9. Thread the draught skirt through the lower awning channel and secure it at each side using the groundsheet pegs.

10. These triangular flaps can either be pegged on the inside, to overlap the draught skirt, or on the outside; dependent on your personal preference.

PLEASE READ THE INSTRUCTIONS CAREFULLY

TIP: Refer to these photographs for assistance whilst erecting your **Porchlite 200**.

1. Spread the canvas out flat on the ground beside your caravan, with the cowl side parallel to it.

2. Slide the awning piping through the awning channel, until the awning is in the desired position on the vehicle; we suggest having someone else hold the canvas in position whilst you do this.

3. Secure the rear pads of the porch awning against the caravan, using the adjustable pegging points. Use the strap along the floor (on the inside) to help maintain proper posture of your caravan awning whilst doing this.

4. Secure the four corners on the porch awning to hold the caravan awning in position whilst the fibreglass pole is being erected.

5. Locate the fibreglass pole, assemble each of the sections, before feeding it through the corresponding sleeve on the canvas.
